TMSSREPORTCOLUMNDELETE

This variable can be used to remove columns from a Command Line Report.

To remove columns, set the variable to an array of comma delimited integers, each representing a column that you would like to remove.

To remove columns 3 and 4 use `TMSSREPORTCOLUMNDELETE=3,4`

The maximum integer number is 32. If the value exceeds the number of columns in the report, or if the value exceeds **32**, the integer is ignored.

The sequence of the array of integers is not important.

environmental variables, printing
