TMSSREPORTHTMLLOGO

The environmental variable TMSSREPORTHTMLLOGO defines the fully qualified path of an image that is to be used when the TMSSREPORTFORMAT specifies HTML output.

Correct full path to logo file must be used. Incorrect path will cause an error and report creation will terminated

The logo file, to avoid any distortion, should be 400 pixels wide by 168 pixels high.

If your logo does not fit these dimensions, use white space padding around your logo to pad it out to an appropriate format.

Image specifications: JPEG image data, JFIF standard 1.02, resolution (DPI), density 96×96, segment length 16, comment: “LEADTOOLS v20.0”, baseline, precision 8, 400×168, components 3

Example

```
set TMSSREPORTHTMLLOGO=C:\Program Files\TapeTrack\Logo.png
```

environmental variables, printing, export, html, path
