

TMSSTDERRTERMINAL

The [Environmental Variable](#) TMSSTDERRTERMINAL displays the stderr on terminal, while still allowing it to be written to the file specified by TMSSTDERRDIR.

Prerequisites

Have variable TMSSTDERRDIR set to a valid file location.

Example

Windows Command Line

```
set TMSSTDERRTERMINAL=true
```

Windows PowerShell

```
$env:TMSSTDERRTERMINAL = true
```

Linux

```
export TMSSTDERRTERMINAL=true
```
